DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 7-11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 7-11 are not limited to tangible embodiments. In view of Applicant's disclosure, specification page 12, paragraph [0034], the medium is not limited to tangible embodiments, instead being defined as including both tangible embodiments (e.g., ROM, RAM, magnetic storage media, optical storage media, flash memory devices) and intangible embodiments (e.g., carrier waves, infrared signals, digital signals). As such, the claim is not limited to statutory subject matter and is therefore non-statutory.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 4,5,8-10,13-16 and 18-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is rejected because it is not clear if each of the first plurality of pointers points to a respective one of the capability structures or if all of the pointers points to the same one capability structure. It is also not clear whether the pointers which are stored in the capability structures are also used to point to capability structures.

Claim 5 is rejected because it depends on claim 4.

3

Application Number: 10/659,963

Art Unit: 2111

Claims 8 and 10 are rejected based on lack of positive antecedent basis of "the method" on line 1 of each claim.

Claim 9 is rejected because it depends on claim 8.

Claim 10 is also rejected because it is not clear if each of the first plurality of pointers points to a respective one of the capability structures or if all of the pointers points to the same one capability structure. It is also not clear whether the pointers which are stored in the capability structures are also used to point to capability structures.

Claim 13 is rejected because it is not clear what occurs in the case where there is only one capability structure. Since the claims recite one or more capability structures it is not clear how the structures could be coupled to each other if there is only one.

Claim 14 is rejected because it depends on claim 13.

Claim 15 is also rejected because it is not clear if each of the first plurality of pointers points to a respective one of the capability structures or if all of the pointers points to the same one capability structure. It is also not clear whether the pointers which are stored in the capability structures are also used to point to capability structures.

Claim 16 is rejected because it depends on claim 15.

Claim 18 is rejected based on lack of positive antecedent basis of "the plurality of capability structures" on lines 5-6.

Claims 19-24 are rejected because they depend on claim 18.

Claim 21 is also rejected because it is not clear if each of the first plurality of pointers points to a respective one of the capability structures or if all of the pointers points to the same one capability structure. It is also not clear whether the pointers which are stored in the capability structures are also used to point to capability structures.

Allowable Subject Matter

- 4. Claims 1,6,12, and 17 are allowed.
- 5. The following is an examiner's statement of reasons for allowance: the independent claims include the limitations of a pointer for each port of a plurality of ports of the multi-port device, and storing the first plurality of pointers in one or more capability structures of the multi-port device. These limitations are not shown by the prior art and would not have been obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show Advanced Switching systems, but they do not show the claimed details.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn A. Auve whose telephone number is (571) 272-3623. The examiner can normally be reached on M-F 8:00 AM-5:30 PM, every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Rinehart can be reached on (571) 272-3632. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
